SIMPLE SOFT SKILLS SURVEY

A tool for screening regional soft skills

As part of the Interreg CENTRAL EUROPE project x-Inno Radar, a survey tool was developed to start collecting data on soft skills, thereby generating valuable information for the participating regions and laying the foundation for scientific research.

The survey tool comprises a simple survey for the general population and a survey for experts in the field of soft skills in the six national languages of the project partnership. Based on the answers to the first questions, respondents are automatically redirected to the appropriate survey.

The use of the survey will be made available to interested regions in Central Europe during the course of the project. This will be possible as part of a defined process and through implementation of automated evaluations.

Please note that the offer will be aimed at institutions and companies committed to the regional development of a region only.

x-Inno Radar

Welcome to the x-Inno Radar Survey on Soft Skills in Industrial Regions!

We are exploring how soft skills—like communication, collaboration, and problem-solving—support industrial regions' development, adaptation, and tackling of contemporary challenges. By taking this survey, you help shape the future skills agenda for your region.

Please note that your responses are kept strictly confidential and are used solely for the purposes of the project. The data collected is anonymized and aggregated to ensure your privacy.

Thank you for your participation!

1. How familiar are you with the field of soft skills? Choose what applies most to you. *

I work directly with soft skills (e.g. training provider, HR personnel etc.)

I have a good general understanding of soft skills

I have basic knowledge about understanding of soft skills

I don't know anything about soft skills
